Francisco de Almeida Pereira

ABOUT ME

I am a 22 year old self-motivated student, passionate about technology and always seeking to contribute.
I am goal oriented and love solving problems from a technological perspective.

SOFT SKILLS

Teamworker	Critical Thinker
Resilient	Adaptable
Curious	Enthusiastic

TECHNICAL SKILLS

- **Proficiency:** Python (Numpy / Pandas / Scikit-Learn / PyTorch).
- **Experienced in :** R; SQL; Java; Matlab.
- **Exposure to:** C, HTML, CSS, Javascript.

INTERESTS

Algorithms	Machine Learning
NLP	Optimization
Fintech	Investement

LANGUAGES

Portuguese
English
Spanish

EDUCATION

University of Amsterdam, Faculty of Science — 2021-2022
MSc in Data Science

University of Porto, Faculty of Engineering — 2016-2021
Integrated Master in Electrical and Computers Engineering

PROFESSIONAL EXPERIENCE

CycleAI — 04/2021-09/2021

- Part-Time. Start Up project aimed at building an automated AI tool to estimate the score of perceived safety for cyclists and from there build a road map based on safety perception.
- Performed exploratory data analyses to extract meaning and provide insights on the results from the Deep Learning model used.

Continental Engineering Services — 02/2021-07/2021

- Master Thesis - "Forehead Detection with Thermal Cameras using Deep Learning".
- Subjects of research: Computer Vision and Deep Learning. Software development in Python using PyTorch. Implementation of different deep learning algorithms for computer vision (Faster R-CNN, YOLO, EfficientDet ...)

Sonae MC — 07/2020-09/2020

- Used Python (Pandas/Numpy/Seaborn/Matplotlib) and PowerBi to perform Business Analyses.
- Developed Python scripts to automate internal operational tasks.
- Aquired knowledge on e-commerce businesses.

Robert Bosch GmbH — 08/2019-09/2019

- Research and Development on secure authentication protocols between mobile devices and Human Machine Interfaces (HMI).

RELEVANT PROJECTS

United Nation Speeches on Life Ladder — 09/2021

- United Nation speech analysis from 1970-2020 matched with the World Happiness Report. Evaluation of how events over the years impact the sentiment of the speeches and prediction of a country's happiness score from its UN speech .

COVID-19 Face Mask Detection — 03/2021

- Faster R-CNN for detecting the usage of face masks on crowded places. Implemented using PyTorch.

Football Match Result Prediction — 04/2020

- Predicting football match results players and teams' attributes sourced from EA Sports' FIFA video game series. Implemented in Scikit-Learn using Random Forest Classifiers and Neural Networks.

Folding Blocks — 02/2020

- Java implementation of path finding algorithms to solve the folding blocks game.
- DFS, BFS, A*

CERTIFICATES

- IBM - Deep Learning with Python and PyTorch — 11/2021
- IBM - PyTorch Basics for Machine Learning — 02/2021

EXTRA CURRICULAR ACTIVITIES

Vision Understanding and Machine Learning (VISUM) - Summer School
07/2021

- Summer school focused on Computer Vision and Machine Learning. Powered by INESC TEC (research group) in partnership with Farfetch. Consisted of theoretical and practical lessons on topics, such as causality, Bayesian Networks and Graph Neural Networks. Pat of the programme was also a competitive challenge involving multimodal networks.

Electrical and Computers Engineering Nuclei
03/2019-08/2020

- Member of the Business Relationships department.

Connect Fest
09/2019

- Workshop on Blockchain and how it affects businesses and governments.
- Workshop on Neural Networks.

German Open Course
03/2019-05/2019

- German language studies (A1 level).

British Council
09/2018-05/2019

- English language studies (C2 level).

G.A.S. Porto
09/2017-06/2018

- Volunteer. Provided support to elderly people.

Institute Helena Nicolau borges
2009-2014

- English language studies (B2 level).
- FCE certificate.

Associação Desportiva Sanjoanense
2004-2016

- Federated Roller Hockey Player.
- Played in the National League Final 8 (2015/2016).
- Played in the European Championship (2014).
- Played in the National League Final 4 (2013/2014).
